

Cloud Computing Tutorial - 4 and 5

CloudSim Simulation

Observation:

Prerequisites:

- JDK 8 or higher
- Eclipse IDE
- CloudSim Source Code
- Apache commons Math Library

Add CloudSim source code to Eclipse

→ Manually copy & paste code into Eclipse project

1. Open Eclipse and create a new Java project
2. Paste CloudSim source code
3. Refresh the project

Add required libraries:

- Add external JAR files

Run a CloudSim example

Eg: CloudSimExample1.java is in source folder
output will display in console

Output: Starting CloudSimExample1
Initializing

Starting CloudSim version 3.0 ...
Datacenter-0 is starting

Simulation completed

output status → success
CloudSimExample1 finished

CloudSim Simulation:

```
C:\Users\Admin>java --version
java 23.0.1 2024-10-15
Java(TM) SE Runtime Environment (build 23.0.1+11-39)
Java HotSpot(TM) 64-Bit Server VM (build 23.0.1+11-39, mixed mode, sharing)

C:\Users\Admin>|
